Axis Bank: Template Analysis and Input to the RCA

Analysis of 4 templates for September 2026

1. Summary

Karix reported lower read rates and CTA conversions on some templates for Axis Bank. We analysed 4 templates for September 2026 from the partner portal export (the 9 send dates of 4 templates). The numbers come from the sheet; the content review comes from Vi's internal model, which scores the card text only and never sees click data. Each send has its own audience and timing, which the sheet does not show, so findings are directional, not proven. What the data cannot show is what happened after the click (visits and orders), which sits with the brand.

- **Delivery and read are not uniform within September 2026.** DeliveryRate is 89.71–94.42% and ReadRate 31.65–38.94%.
- **Click rate varies 5.6x.** P2AResponseRate (click rate) runs from 0.33% (axis_rcs_24mar_2) to 1.84% (axisbank_1sept (3 Sep)).
- **Scored from the text alone, the content score ordered 2 of 4 comparable template pairs the same way as click rate (2 the other way, 2 tied).**
- **31.0% of submitted messages failed before sending** in September 2026; this is separate from template content.
- **Not yet answerable from this data:** visits and orders after the click, audience mix, frequency, send time and device split.

2. Template data

Source: the template export from the partner portal. Each row is one Date. Column names below are the sheet's own. P2AResponseRate is the click rate (P2AResponses ÷ Messages Read). Ratios the sheet does not contain are marked * and named for what they are used for.

2.1 Counts as in the sheet

September 2026

Template	Date	GoogleID	Messages Submitted	Messages Sent	Messages Delivered	Messages Read	Messages Failed	Messages Expired	P2AResponses
axis_rcs_24mar_2	3 Sep	yvyv0sd7	1,737,800	984,804	929,925	308,809	752,996	51,706	1,020
axisbank_1sept	3 Sep	yvyv0sd7	1,366,206	850,800	770,678	255,473	515,406	78,844	4,722
axisbank_1sept	10 Sep	yvyv0sd7	1,364,199	853,089	768,374	243,226	511,110	83,754	3,835

GoogleID is shown without the brand prefix and the "_agent" suffix.

2.2 Rates

DeliveryRate, ReadRate and P2AResponseRate are the sheet's own columns (P2AResponseRate is the click rate). The rates marked * are our calculations from the sheet counts, defined below the table.

September 2026

Template	DeliveryRate	ReadRate	P2AResponseRate (click rate)	Pre-send failure rate*	End-to-end delivery rate*	Expiry rate*	Read rate, sent base*	Click rate, delivered base*
axis_rcs_24mar_2	94.42%	33.20%	**0.33%**	43.3%	53.5%	5.3%	31.36%	0.11%
axisbank_1sept	90.58%	33.14%	**1.84%**	37.7%	56.4%	9.3%	30.03%	0.61%
axisbank_1sept	90.06%	31.65%	**1.57%**	37.5%	56.3%	9.8%	28.51%	0.50%
phonepe_offers_8sep	94.41%	37.72%	**1.04%**	39.7%	57.0%	5.2%	35.61%	0.40%
axis_rcs_campaign_16	90.62%	38.82%	**0.78%**	20.1%	72.4%	9.2%	35.19%	0.31%

Template	DeliveryRate	ReadRate	P2AResponseRate (click rate)	Pre-send failure rate*	End-to-end delivery rate*	Expiry rate*	Read rate, sent base*	Click rate, delivered base*
phonepe_offers_8sep	94.15%	38.94%	**0.83%**	37.1%	59.2%	5.7%	36.67%	0.32%
axisbank_1sept	89.71%	33.35%	**1.49%**	36.8%	56.7%	10.2%	29.93%	0.50%
axis_rcs_campaign_16	93.12%	37.88%	**0.63%**	20.0%	74.5%	6.8%	35.28%	0.24%
axis_rcs_campaign_16	92.66%	36.77%	**0.53%**	20.0%	74.2%	7.1%	34.08%	0.20%
Total, 2026	**92.07%**	**36.34%**	**0.90%**	**31.0%**	**63.5%**	**7.7%**	**33.46%**	**0.33%**

Name	Calculation	Used for
DeliveryRate	Messages Delivered ÷ Messages Sent	Platform delivery once a message has left the platform
ReadRate	Messages Read ÷ Messages Delivered	How many delivered messages were opened
P2AResponseRate (click rate)	P2AResponses ÷ Messages Read	Click rate: share of read messages that were clicked
Pre-send failure rate*	Messages Failed ÷ Messages Submitted	Sizing the messages lost before they leave the platform
End-to-end delivery rate*	Messages Delivered ÷ Messages Submitted	Reconciling with a brand's own delivery rate, which often uses submitted as the base
Expiry rate*	Messages Expired ÷ Messages Sent	Sent messages that expired before delivery; relevant to time-bound offers
Read rate, sent base*	Messages Read ÷ Messages Sent	Comparison with a read rate quoted on a different base
Click rate, delivered base*	P2AResponses ÷ Messages Delivered	Comparison with a brand's CTR, which is usually visits / delivered

*Totals and * rates are rounded. The sheet truncates its template-level rates to two decimals, so a value can differ by 0.01 point from a rounded recalculation.*

2.3 By GoogleID

GoogleID	Year	Templates	Messages Submitted	Pre-send failure rate*	DeliveryRate	ReadRate	P2AResponseRate (click rate)
yvyv0sd7	2026	axis_rcs_24mar_2, axisbank_1sept, phonepe_offers_8sep, axis_rcs_campaign_16	15,504,610	31.0%	92.07%	36.34%	0.90%

Rates by GoogleID are recomputed from the summed counts.

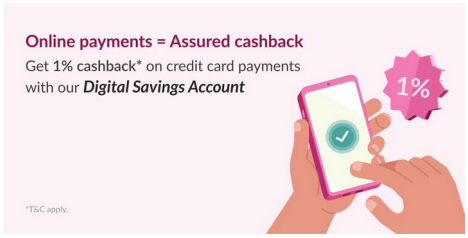

2.4 What the numbers show (September 2026)

1. **Delivery and read within September 2026.** DeliveryRate is 89.71–94.42% and ReadRate 31.65–38.94% across the 4 templates. The spread is wide enough to look at template by template.
2. **axisbank_1sept (10 Sep) has the lowest ReadRate.** At 31.65% it is clearly below the median template.
3. **Click rate varies 5.6x.** P2AResponseRate runs from 0.33% (axis_rcs_24mar_2) to 1.84% (axisbank_1sept (3 Sep)). Each row is a single send date, so audience, day and offer are mixed in; treat the gap as a signal, not proof.
4. **Pre-send failure.** 31.0% of Messages Submitted failed before sending, and a further 7.7% of Messages Sent expired. Reason codes are needed to know why.
5. **Click rate on a delivered base.** Click rate, delivered base* is 0.33% overall. Compare it with a brand's CTR only on that base, and only as a reconciliation point.

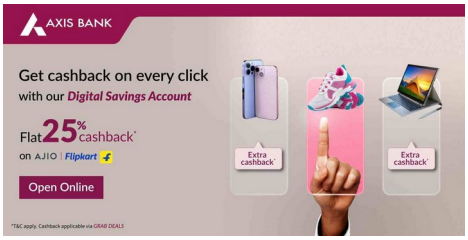

3. Creative and text review

Each card combines a media image, a title, a description and one URL button. Content risk ratings are our view of the content, made from the content alone and shown beside the results for comparison. Emojis in card text may appear as placeholders.

3.1 axis_rcs_24mar_2: low content risk

axis_rcs_24mar_2 | 3 Sep 2026 | GoogleID yvyv0sd7	DeliveryRate **94.42%** | ReadRate **33.20%** | Click rate **0.33%** | Content risk: **Low**
 **Card text** Title: "Open Axis Bank Digital Savings Account in just 2 clicks." Description: "Dear Customer, Thousands have already upgraded to smarter banking! What are you waiting for? Open an Axis Bank Digital Savings Account in 7 minutes and enjoy these exclusive perks: [icon] 1% cashback* on Axis Bank's credit card bill payment [icon] Flat 25% cashback* on Flipkart & AJIO via **GRAB DEALS** [icon] Complimentary BookMyShow ticket* every month [icon] Shopping voucher worth ₹500* across 150+ brands [icon] 1% cashback* on online spends [icon] No video KYC required *T&C apply Regards, Axis Bank" Button: Open Online	**Creative:** (see image) **Works** • **A concrete number.** A price, amount, percentage or quantity appears in the text itself. • **One clear action.** The text asks for one thing, the button. **Watch-outs** • **Long description.** The description runs past the point where a reader will finish it.

3.2 axisbank_1sept: low content risk

axisbank_1sept | 3 sends, 3 Sep to 24 Sep | GoogleID yvyv0sd7	DeliveryRate **90.12%** | ReadRate **32.72%** | Click rate **1.64%** | Content risk: **Low**
 **Card text** Title: "Open Axis Bank Digital Savings Account in just 2 clicks." Description: "Dear Customer, Complete your Axis Bank Digital Savings Account application now and enjoy exclusive benefits: [icon] Flat 25% cashback* [icon] on Flipkart & Ajio every time you shop [icon] Buy one get one offer* on BookMyShow every month [icon] 1% cashback* on online spends [icon] Instant e-debit card [icon] Access to 250+ banking services *T&C apply. Offers applicable via **GRAB DEALS**. Regards, Axis Bank" Button: Open Online	**Creative:** (see image) **Works** • **A concrete number.** A price, amount, percentage or quantity appears in the text itself. • **One clear action.** The text asks for one thing, the button. **Watch-outs** • **Long description.** The description runs past the point where a reader will finish it.

3.3 phonepe_offers_8sep: low content risk

phonepe_offers_8sep | 2 sends, 11 Sep to 23 Sep | GoogleID yvyv0sd7	DeliveryRate **94.28%** | ReadRate **38.34%** | Click rate **0.94%** | Content risk: **Low**
 **Card text** Title: "Grab **INR 100 cashback** on UPI payments!" Description: "Make your first two UPI payments via PhonePe with Axis Bank RuPay Credit Cards and earn flat INR 50 cashback per transaction. Offer valid till: 30th Sep 2026. *T&C apply." Button: Know more	**Creative:** (see image) **Works** • **A concrete number.** A price, amount, percentage or quantity appears in the text itself. • **One clear action.** The text asks for one thing, the button. **Watch-outs**

3.4 axis_rcs_campaign_16: low content risk

axis_rcs_campaign_16 | 3 sends, 23 Sep to 30 Sep | GoogleID yvyv0sd7	DeliveryRate **91.74%** | ReadRate **37.93%** | Click rate **0.67%** | Content risk: **Low**
 **Card text** Title: "Unlimited Health Protection at [icon]" Description: "Unlock Unlimited Health cover with ReAssure 3.0 by Niva Bupa Health Insurance for a worry-free tomorrow. Get insured today!" Button: Buy Now	**Creative:** (see image) **Works** • **A concrete number.** A price, amount, percentage or quantity appears in the text itself. • **Short text.** The whole card text is brief enough to read in one glance. • **One clear action.** The text asks for one thing, the button. **Watch-outs**

3.5 Click rate by send (4 templates, 9 sends, September 2026)

P2AResponseRate is the sheet's click rate (P2AResponses ÷ Messages Read). The creative and text are only seen by people who read the message, so the read base is the right measure for judging them. The delivered base is shown for an end-to-end view (marked *, our calculation).

Template	Date	Messages Read	P2AResponses	P2AResponseRate (click rate)	Index vs blended click rate*	Click rate, delivered base*
axisbank_1sept	3 Sep	255,473	4,722	**1.84%**	2.05x	0.61%
axisbank_1sept	10 Sep	243,226	3,835	**1.57%**	1.75x	0.50%
axisbank_1sept	24 Sep	258,680	3,873	**1.49%**	1.66x	0.50%
phonepe_offers_8sep	11 Sep	344,893	3,617	**1.04%**	1.16x	0.40%
phonepe_offers_8sep	23 Sep	370,105	3,086	**0.83%**	0.93x	0.32%
axis_rcs_campaign_16	23 Sep	880,401	6,920	**0.78%**	0.87x	0.31%
axis_rcs_campaign_16	24 Sep	272,795	1,722	**0.63%**	0.70x	0.24%
axis_rcs_campaign_16	30 Sep	643,841	3,428	**0.53%**	0.59x	0.20%
axis_rcs_24mar_2	3 Sep	308,809	1,020	**0.33%**	0.37x	0.11%
Total (9 sends)		**3,578,223**	**32,223**	**0.90%**	**1.00x**	**0.33%**

Index = click rate of the send ÷ blended click rate of all 9 sends (0.90%).

Which text features line up with click rate

Feature	axisbank_1sept (1.64%)	phonepe_offers_8sep (0.94%)	axis_rcs_campaign_16 (0.67%)	axis_rcs_24mar_2 (0.33%)	Lines up with click rate?
Number, price or code in the text	Yes	Yes	Yes	Yes	**Not testable.** All templates are the same on this feature.
Deadline in the text	No	Yes	Yes	No	**No clear direction** to test.
Chance-based wording	No	No	No	No	**Not testable.** All templates are the same on this feature.
Minimum or maximum wording	No	No	No	No	**Not testable.** All templates are the same on this feature.
Content score (text only)	1.0 (Low)	0.0 (Low)	0.0 (Low)	1.0 (Low)	**Weakly.** Scored from the text alone, the content score ordered 2 of 4 comparable template pairs the same way as click rate (2 the other way, 2 tied).

- **Scored from the text alone, the content score ordered 2 of 4 comparable template pairs the same way as click rate (2 the other way, 2 tied).**
- **Limits.** Few templates and single send dates: a feature that lines up here is a lead for the A/B test, not a cause.

4. Cross-template findings

1. **Delivery and read differ within September 2026.** DeliveryRate is 89.71–94.42% and ReadRate 31.65–38.94%. Look at the lower templates first.
2. **Click rate separates the templates.** It varies 5.6x within September 2026.
3. **Does the text-only content score match the result?.** Scored from the text alone, the content score ordered 2 of 4 comparable template pairs the same way as click rate (2 the other way, 2 tied). The scoring checks are starting checks that are not yet validated across brands; the match is directional, not proven.
4. **The most common text flag.** "Long description" fired on 2 of 4 templates (axis_rcs_24mar_2, axisbank_1sept).
5. **A large share of messages never leaves the platform.** 31.0% of Messages Submitted failed before sending. This is separate from template content.
6. **Post-click is the remaining gap.** The sheet shows clicks, not what followed. Whether the higher-click templates also drove more visits and orders needs per-template data from the brand.

5. Root-cause hypotheses

Where each candidate explanation stands on the evidence so far.

Hypothesis	Evidence	Status	Next step and owner
H1. Delivery or read differs between templates	DeliveryRate 89.71–94.42% and ReadRate 31.65–38.94% across the templates.	Plausible, needs data	Check the lower templates. Platform partner
H2. Offer specificity and content	Scored from the text alone, the content score ordered 2 of 4 comparable template pairs the same way as click rate (2 the other way, 2 tied). Visits and orders after the click are not visible in the sheet.	Plausible, needs data	Per-template visits and orders; A/B test. Axis Bank / Platform partner / Vi
H3. Scale dilution and audience mix	The sheet holds no audience data.	Unknown	Audience tier and engagement by campaign. Axis Bank / Google
H4. Pre-send failures	31.0% of Messages Submitted failed before sending in September 2026.	Open, high priority	Failure reason codes. Platform partner
H5. Send time and offer timing	Expiry rate* is 7.7% of Messages Sent.	Plausible, needs data	Send-time logs. Platform partner / Axis Bank

6. Recommendations

#	Recommendation	Why (evidence)	Owner	Priority
1	**Add a per-template tracking tag to the button URL** and report visits and orders per template.	The sheet shows clicks but not what happens after; tags tie each template to visits and orders.	Axis Bank	Now
2	**Diagnose pre-send failures** and add a reachability check before submission.	31.0% of Messages Submitted failed before sending.	Platform partner	Now
3	**Use a formal, reassuring tone and a low-commitment CTA** such as Check Eligibility for loans and insurance.	Vi guardrails G2 and G5 for BFSI; check the current CTAs against them.	Axis Bank	Next
4	**Cap frequency, rotate creatives and scale in tiers.**	Vi guardrail G6; frequency and audience data are needed to see whether it applies.	Axis Bank / Platform partner	Next
5	**Cut the description** to the offer, the rule and one action.	The text check "Long description" fired on 2 of 4 templates: axis_rcs_24mar_2, axisbank_1sept. In this run the click data points the other way, so test it before acting.	Axis Bank	Test
6	**Run a clean A/B test:** the current text against a version with a specific offer, same audience and send time.	Isolates the content effect that single-send-date data cannot.	Axis Bank / Platform partner / Vi	Test
7	**Pre-launch template review by Vi,** at least a week before launch.	Closes the loop on content, messaging, CTA placement and flow.	Vi	Ongoing

Template dos and don'ts (draft for Axis Bank)

Do	Don't
• Lead with the most specific offer: a price, a code or a named benefit • Pair any deadline with a concrete benefit • Make the image and the text say the same thing • Keep the rule and the deadline within the first two lines • Use one offer and one clear action per card • Put any figure that matters in the text, not only in the image	• Use sweepstakes language for mass sends • Use a minimum or a maximum in place of the offer • Push urgency with nothing named • Draw a button into the image • Stack several propositions or conditions in one card • Send repeated promos to the same audience without a frequency cap

7. Data still needed

Owner	Item	Why it matters	Priority
Axis Bank	Visits and orders per template (tagged URLs)	Shows what happens after the click and tests whether content explains the click rate	High
Google / Platform partner	Audience tier or demographics, send time and frequency per campaign	Separates content from audience and timing; Vi has no visibility	High
Platform partner	Failure reason codes by GoogleID and template	The largest loss in the funnel; may skew who is reached	High
